

Performance Testing

Date	30 September 2026
Team ID	SWTID-2026-8026
Project Name	Import Data using Transform maps (Spreadsheet)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Import Sets and Transform Histories (Import Set Runs)
Type of Testing	Load Testing
Target Module / API	Excel (.xlsx) Data Source, Import Set and Transform Map
Test Environment	Cloud (ServiceNow Personal Developer Instance)
Test Date	22 September 2026 and 23 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Import spreadsheet with 5 rows (sample sheet 23.xlsx)	1	1	All 5 rows inserted without errors
2	Import spreadsheet with 6 rows (sample sheet 23 (1).xlsx) containing existing records	1	1	New record inserted, existing records not duplicated

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1 second	Pass	Both transforms took 1 second
2	Response Time (Max)	< 5 seconds	1 second	Pass	Within target
3	Throughput (Req/sec)	-	5 to 6 rows/sec	-	5 rows and 6 rows in 1 second
4	Error Rate	< 1%	0%	Pass	0 errors in 11 rows
5	CPU Utilization	< 80%	Not measured	N/A	Managed by ServiceNow PDI
6	Memory Utilization	< 80%	Not measured	N/A	Managed by ServiceNow PDI

Step 4: Observations & Analysis

Key Findings:

Both imports completed in 1 second with 0 errors. The first import inserted all 5 rows. In the second import (6 rows), 1 new row was inserted and 5 rows were ignored because those records already existed.

Bottlenecks Identified:

No bottleneck was seen for small files (5 to 6 rows). Larger spreadsheets were not tested.

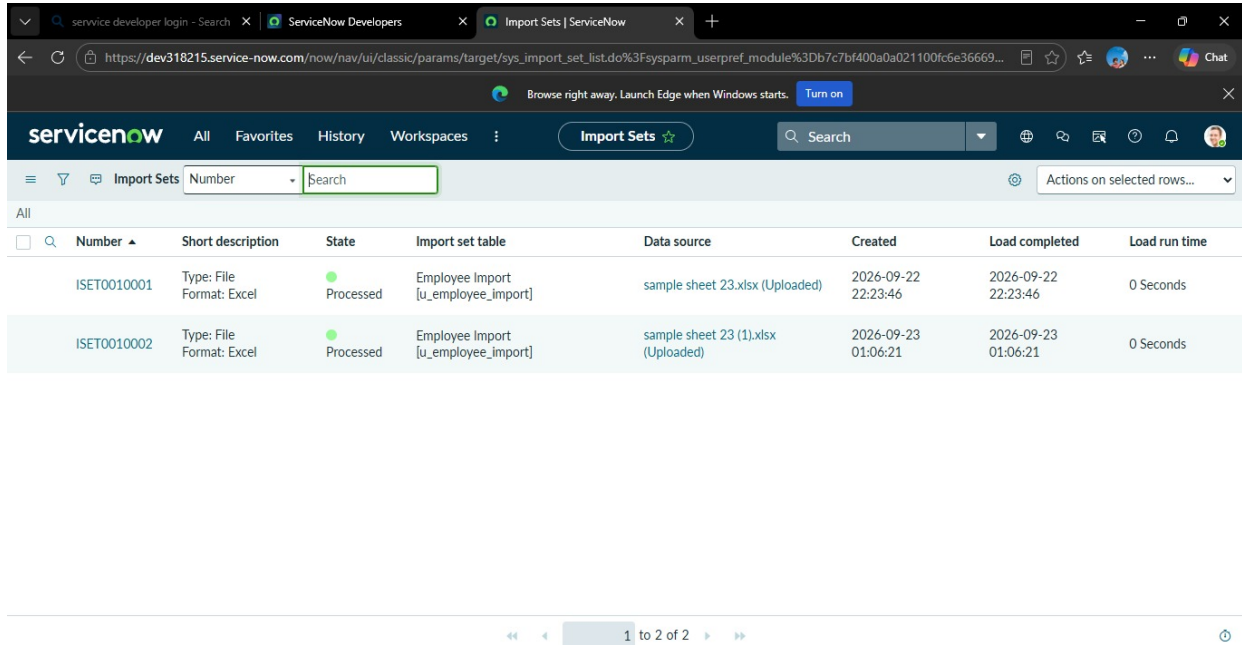

Optimization Steps Taken:

Used Coalesce on the key field so existing records are not duplicated, and removed unused field maps.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

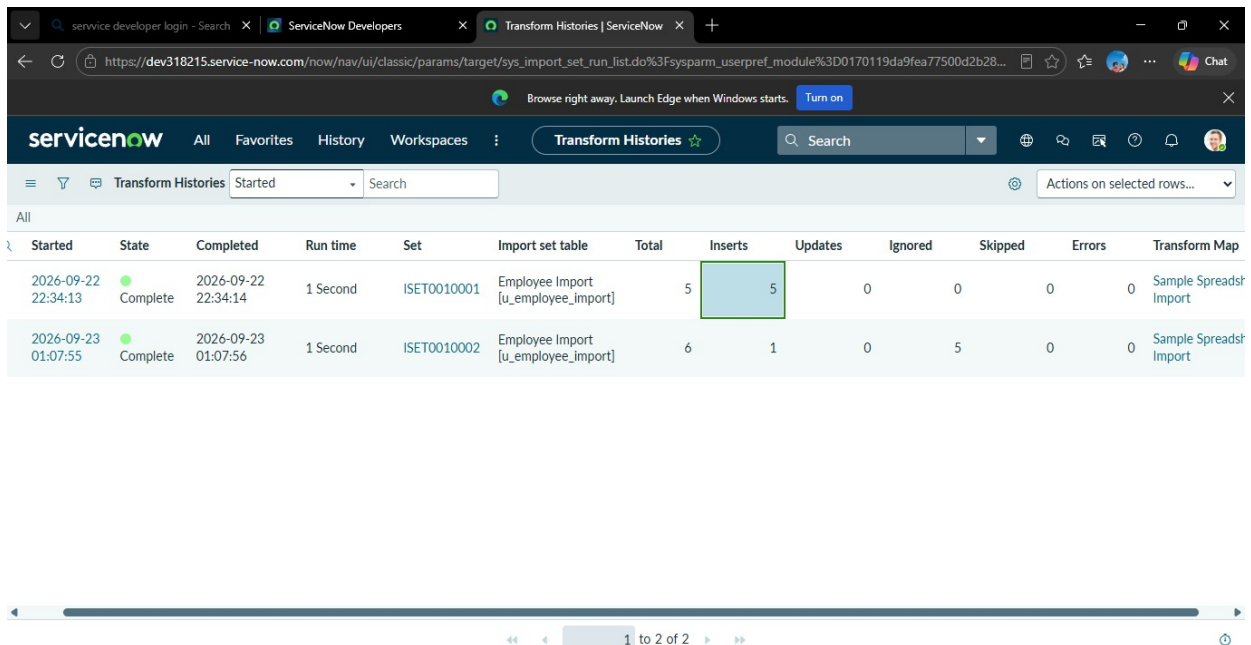

Screenshot 1: Import Sets (both spreadsheet imports in Processed state)

The screenshot shows the ServiceNow 'Import Sets' page. The table lists two import sets, both in a 'Processed' state. The first import set (ISET0010001) was created on 2026-09-22 and completed on the same day. The second import set (ISET0010002) was created on 2026-09-23 and completed on the same day. Both imports used 'sample sheet 23.xlsx' as the data source.

Number	Short description	State	Import set table	Data source	Created	Load completed	Load run time
ISET0010001	Type: File Format: Excel	Processed	Employee Import [u_employee_import]	sample sheet 23.xlsx (Uploaded)	2026-09-22 22:23:46	2026-09-22 22:23:46	0 Seconds
ISET0010002	Type: File Format: Excel	Processed	Employee Import [u_employee_import]	sample sheet 23 (1).xlsx (Uploaded)	2026-09-23 01:06:21	2026-09-23 01:06:21	0 Seconds

Screenshot 2: Transform Histories (total, inserts, ignored and errors for each run)

The screenshot shows the ServiceNow 'Transform Histories' page. The table lists two transform runs, both in a 'Complete' state. The first run (ISET0010001) was completed on 2026-09-22 and had 5 inserts, 0 updates, 0 ignored, 0 skipped, and 0 errors. The second run (ISET0010002) was completed on 2026-09-23 and had 1 insert, 0 updates, 0 ignored, 5 skipped, and 0 errors.

Started	State	Completed	Run time	Set	Import set table	Total	Inserts	Updates	Ignored	Skipped	Errors	Transform Map
2026-09-22 22:34:13	Complete	2026-09-22 22:34:14	1 Second	ISET0010001	Employee Import [u_employee_import]	5	5	0	0	0	0	Sample Spreadst Import
2026-09-23 01:07:55	Complete	2026-09-23 01:07:56	1 Second	ISET0010002	Employee Import [u_employee_import]	6	1	0	5	0	0	Sample Spreadst Import
