

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-8026
Project Name	Import Data using Transform maps (Spreadsheet)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow admin who receives Excel/CSV data from other teams.	Import spreadsheet data into the correct ServiceNow table using a Transform Map.	Source column names don't match target fields and values come in mixed formats (dates, choices, references).	Field mapping is manual and there is no standard data cleaning before the import.	Frustrated and stressed.
PS-2	A data analyst / ITSM process owner who depends on accurate records.	Load large spreadsheets without duplicates or bad records and easily trace failures.	Duplicate and invalid rows get inserted and import errors are hard to find and fix.	Coalesce fields are not set properly and there is no validation or error-review process.	Worried about data accuracy and lacking confidence in reports.
